INSTRUCTIONS FOR SELECTING THE SPECIALTY PHARMACY FOR HIBSAGO IN THE EPIC EHR

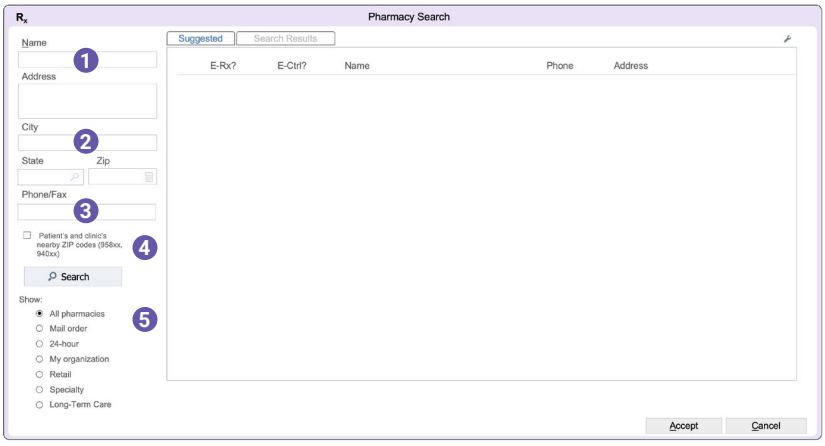
Background and limitations

This document helps healthcare providers select the specialty pharmacy to prescribe HIBSAGO within the Epic system. Because HIBSAGO is primarily dispensed by PANTHERx Rare Pharmacy, it's important to choose the appropriate pharmacy at the point of prescribing. The eligible specialty pharmacy is listed in the Surescripts pharmacy database and can be selected directly within the Epic EHR. If applicable, providers should follow health system guidance regarding specialty pharmacy selection.

These instructions are not appropriate for other conditions or therapeutic areas or for other EHR systems. The processes outlined are variable and not all steps will apply to every user. Any steps or settings that are not part of a user's standard process should be excluded or modified accordingly. Any questions should be directed to the appropriate service provider.

Instructions to select the specialty pharmacy in the Epic EHR system

1. Enter the full specialty pharmacy name in the **Name** field. Pharmacy chains will have multiple listings, but few will match the exact name referenced in the Certified Specialty Pharmacy resource
2. Add the **City** to narrow the results
3. Consider using the **Phone/Fax** field to further refine your search
4. Uncheck the **Patient's and clinic's nearby ZIP codes** box, as it limits results to nearby pharmacies. The specialty pharmacy you need may not appear because of this geolocation feature
5. Select the **All pharmacies** radio button to ensure all pharmacy types are included in the search



For illustrative purposes only. Example of pharmacy search feature.
